On ClimaSouth Project

Objectives

- To support the **transition** of partner countries **towards LCDCR** through
 - capacity development,
 - resource mobilization and
 - proactive climate risk management
- To enhance negotiation & implementation capacities

Where ? In 9 MENA countries

- Algeria, Lebanon, Morocco,
- Tunisia, Libya, Egypt,
- Palestine, Israel and Jordan

How ?

- Thematic workshops to address issues of regional character
- National activities linked to the objectives, national priorities & potential replication in the region
- EU-South/South country dialogue website/platform

ClimaSouth web site / KB platform <http://www.climasouth.eu/>

NEWS & EVENTS

National Stakeholders Workshop in Jordan: Climate Change Capacity Building & NAMA identification, formulation
AMMAN, JORDAN - 19-21 August 2014

Good practices for GHG inventory presented to South Mediterranean countries
GENOA, ITALY - 23-27 June 2014

PROJECT COMPONENTS

Capacity building / development
On the Implementation of Climate Change instruments

Low carbon development
Best practices in GHG emission reporting, modelling & analysis

Resilience Adaptation
Improving climate data use, modelling & planning

Climate Change finance
Facilitating access to finance mechanisms

Promoting regional dialogue
Supporting national initiatives

Cooperation under the European Neighbourhood Policy

EU Neighbourhood Info Centre

The ClimaSouth project supports climate change mitigation and adaptation in 9 South Mediterranean countries: Algeria, Egypt, Israel, Jordan, Lebanon, Libya, Morocco, Palestine and Tunisia. The project was initiated in February 2013 and will be implemented over 48 months with a total budget of € 5 million provided by the European Union. Key stakeholders include technical government departments at operational and policy level, UNFCCC focal points, decision makers, and other stakeholders such as local government and civil society representatives. Its overall objective is to assist with the transition of partner countries towards low carbon economies and enhanced climate resilience.

100%

ClimaSouth action on Adaptation ⁽¹⁾

At the national level

- ALGERIA : Impacts of Climate change on forest fires to inform adaptation actions in the forestry sector
- LEBANON : Strengthening EWS in the Bekaa Valley to better adapt irrigation management to climate variability and change
- TUNISIA : national activity on adaptation under development
- EGYPT : strengthening institutional capacity / Climate Change Center for Excellence / adaptation component

ClimaSouth action on Adaptation ⁽²⁾

At the regional level

- Workshop on improving climate information (Lecce, April 2014)
- Downscaling training to generate data that can enable adaptation actions in the future (pilot demonstrations underway in different countries) (March, 2015)

ClimaSouth Actions on mitigation

At the national level

- Support to NAMA development
as in Jordan (NAMA on Solar Water Pumping) & Morocco
- Support to CB on GHG modeling (use of LEAP model) to elaborate
BURs and national communications to UNFCCC
as in Israel
- Support to establishing National Systems of Inventories
as in Morocco
in synergy with other projects as LECB, 4C, TNC, ...

ClimaSouth Actions on mitigation

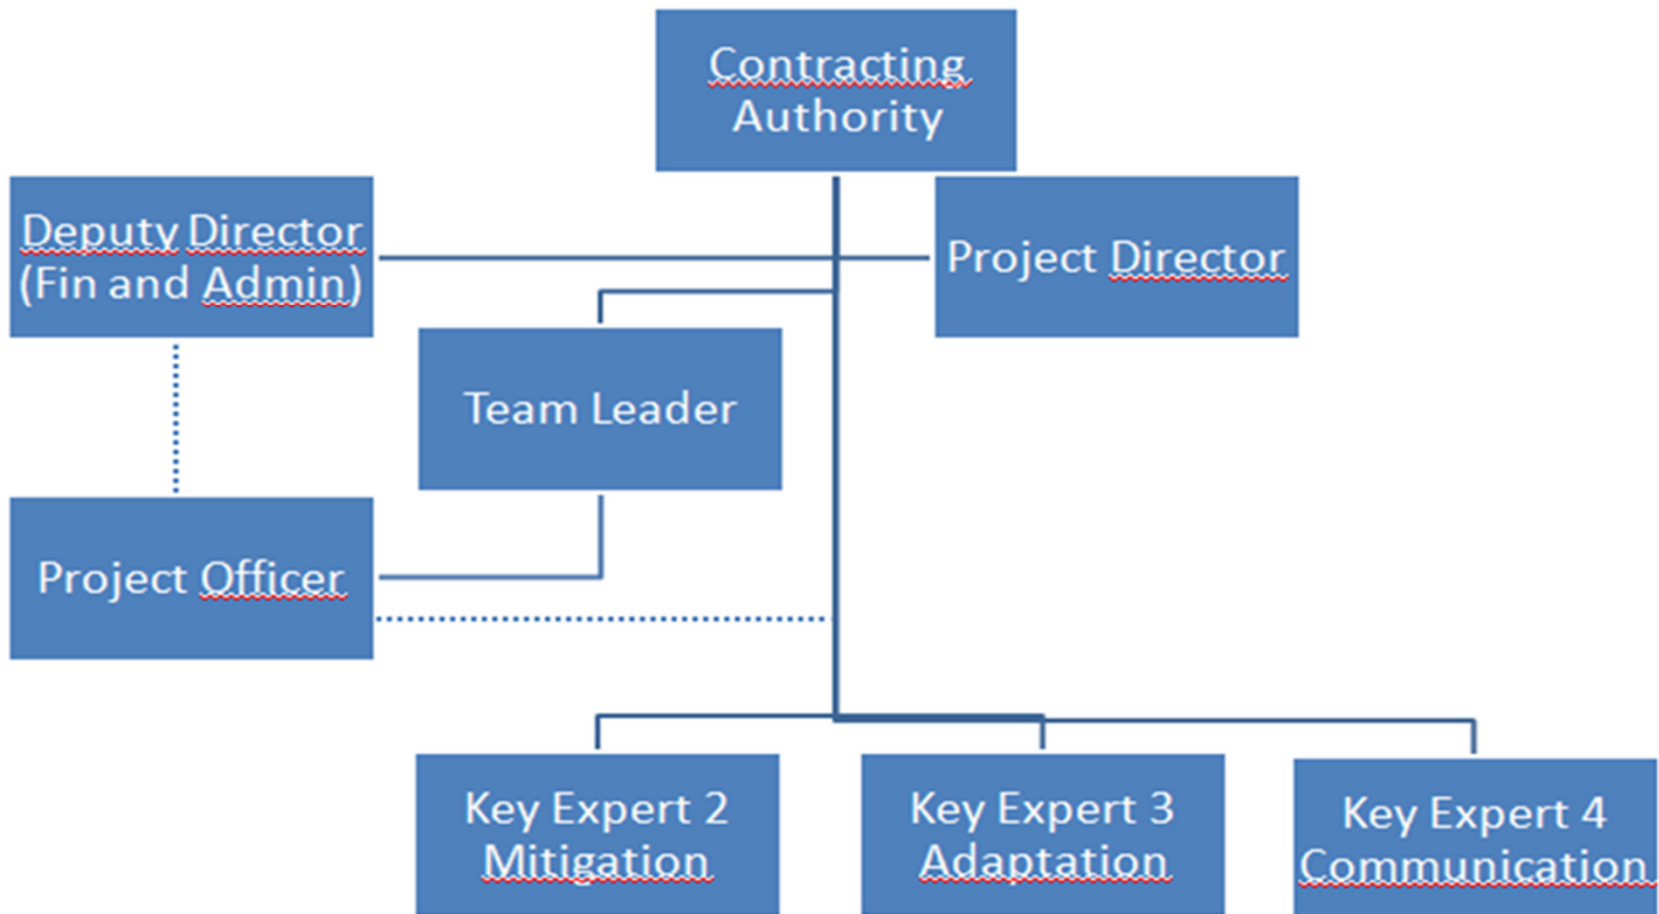

At the regional level through

- workshops & seminars on :
 - GHG emissions inventories & modeling projections
 - Development of LEDS
 - Development of NAMAs
- enhancing regional (EU-South and South-South) cooperation & dialogue on CC issues & on INDCs

ClimaSouth support to ENPI South countries

- enhancing capacities
- supporting National Systems for GHG Inventories & projections modeling
- Contributing to developing national adaptation plans (NAP)
- developing LEDS and NAMAs
- Enhancing regional dialogue on CC issues

ClimaSouth Project structure

Mitigation & Adaptation in the Southern Mediterranean Region

ClimaSOUTH
