*Regional Workshop on Improving
Climate Change Information
April 28-30, 2014, Lecce, Italy*

INTRODUCTION TO THE **SWOT** ANALYSIS

AGRICONSULTING

Sviluppo Globale
leading companies for global mission

OBJECTIVE

Through cross and complementary vision:

- National Meteorological Services (NMS)
- National partners users of information/Climate Services

Show that

- **NMHSs:**
 - **Opportunities** to grasp but also **threats** to face
 - We can also **benefit** by **regional/global initiatives**
- **Partenaires nationaux:**
 - Can **benefit** by better information/climate service
 - To do this: a **better definition** of the needs of national partners **is crucial**

SWOT: Definition of context

- Strategic field of activity targeted by the SWOT: "*Information and climate service by national Meteorological Services to supply its partners to refine the analysis of the vulnerability and the implementation of adaptation action*"
- The system studied: the '**National Meteorological Services**';
- We considère:
 - **Internal:** everything related to national Meteorological Services
 - **External:** everything related to regional/global initiatives & national partners who benefit from these climate information and services

QUESTIONS

Related to the "National Meteorological Services"

1. Which means and assets currently available national Meteorological Services to provide climate information and services of acceptable quality?
2. What are the gaps / constraints faced by national Meteorological Services that hinder the provision of climate information and quality services?

QUESTIONS

Related to regional/global initiatives & national partners

3. What are the opportunities that would promote demand and effective use of climate information and services?
4. Which threats that are likely to reduce the interest and the effective use of climate information and services?
5. Do regional/global initiatives/products meet your expectations, especially from the perspective of helping national /sub-national experts develop climate services ?
be specific on wich one ?
6. What can be the contribution of your institution to enhance these types of regional products and initiatives?

Expected finding

Positive aspects/avantages etc.

Gaps/constraints, etc.

Strengths

Characteristics of the activity that give it an advantage over others.

Weaknesses

Characteristics that place the activity at disadvantage relative to others.

Opportunities

Elements that the project could exploit to its advantage

Threats

Elements in the environment that could cause trouble to the activity

In relation to national Met services

In relation to other national partners
