

MARRAKECH
COP22|2016|CMP12
 UN CLIMATE CHANGE CONFERENCE
 مؤتمر الأمم المتحدة للتغير المناخ

Low carbon development
 for climate resilient societies

A project funded by
 the European Union

Tuesday 15th | **19.00-20.30**
November | **Room Ziz**
GREEN ZONE

**STRENGTHENING ACCESS TO
 CLIMATE FINANCE: EXPERIENCES
 FROM THE SOUTHERN
 MEDITERRANEAN REGION**

speakers	Bernardo Sala <i>ClimaSouth Team Leader</i>	Casper Van der Tak <i>ClimaSouth mitigation and climate finance expert</i>	Ali Agoumi <i>Climate Change expert, Morocco</i>	Faiçal Mekouar <i>VP CGEM or Fadel Agoumi, DG CGEM Morocco</i>	Hassen Chourabi <i>DGACTA Tunisia</i>	Mohamed Alaoui <i>Africa Climate Solutions, Consultant to MorSEFF, Morocco</i>	Meryem Andaloussi <i>ADA GCF & AF Focal Point, Morocco</i>	Monica Scatata <i>Head of Environment, Climate and Social Policy Office, EIB</i>
-----------------	---	--	--	--	---	--	--	--

Accessing flows of climate finance remains a challenge in the South Mediterranean region. Through prominent representatives of the private sector from the region (CGEM Morocco, DG ACTA Tunisia, Africa Climate Solutions), the side event will examine the main barriers hampering small and medium enterprises in accessing climate finance. The discussion will also benefit from the perspectives of international donors such as the Green Climate Fund and the European Investment Bank, showcasing their strategies, tools and mechanisms for the region.

moderator

Faouzi Senhaji

The ClimaSouth Project

Funded by the European Union, the project supports the transition towards low carbon economies while building resilience to climate change, in South Mediterranean countries: Algeria, Egypt, Israel, Jordan, Lebanon, Libya, Morocco, Palestine and Tunisia.

A project funded by
the European Union

ALGERIA EGYPT ISRAEL JORDAN
LEBANON LIBYA MOROCCO PALESTINE TUNISIA

Negotiation & implementation capacity

Extensive training of policy makers on the negotiation and implementation of climate agreements.

Low carbon development

Strengthening Monitoring, Reporting and Verification (MRV) of Greenhouse gas (GHG) emissions and the implementation of Nationally Determined Contributions (NDCs), including Nationally Appropriate Mitigation Action (NAMA) portfolios and Low Emission Development Strategies (LEDS).

Resilience & Adaptation

Improving the modelling and use of climate data, and assisting with vulnerability assessments and the formulation of National Climate Action Plans (NAPs).

Climate Change finance

Facilitating access to climate change finance mechanisms, which support low carbon development and resilience to climate change.

Promoting dialogue & regional cooperation

Enhancing, across project components, the quality of regional dialogue both between partner countries and with the European Union.
